MID-WEST WIRE PRODUCTS, INC.

The unmatched
**Sturdy, stackable,
 STOCK TOTE BINS.**
 For your bulk handling
 and storage needs.

Strong and durable material handling containers.

FEATURES

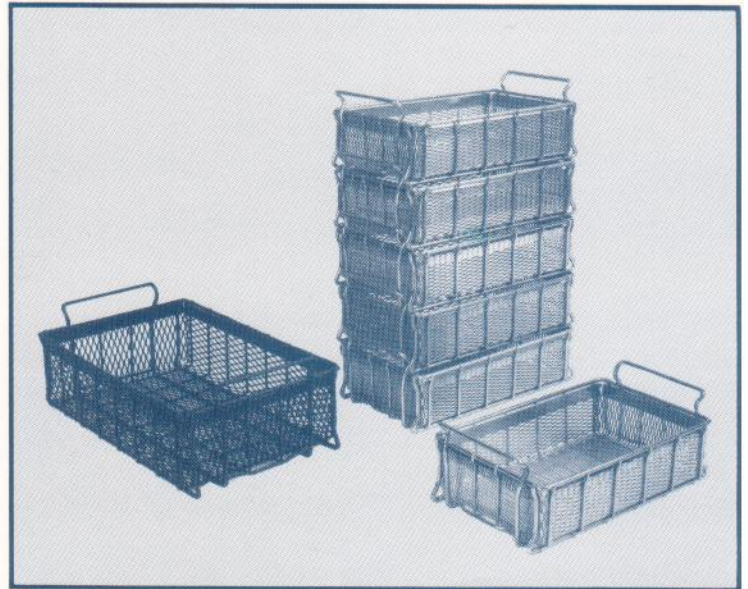

For your bulk parts handling requirements, Mid-West Wire's Stock Tote Bins are without equal. Over sixty years experience in the design and manufacture of industrial materials handling equipment has resulted in these parts carrying containers of exceptional quality.

Mid-West Wire pioneered several key design characteristics to further enhance the integration of the Mid-West Wire Stock Tote Bins into your materials handling system. As an example, the INTEGRAL HANDLE RUNNER permits secure stacking, in tiers, because of the unique locking feature. Additionally, the J-EDGE PERIMETER CAP protects personnel, and your products, from damage that could result from the exposed edge of the Flattened Expanded Metal (F.E.M.) liner.

Whether you move one Stock Tote Bin or an entire stack, you'll find they are easily transported by hand, lift truck, on shipping pallets, or by monorail or roller conveyor.

The Stock Tote Bins models detailed below are "standards" and, as such, are maintained in Mid-West Wire's inventory ready for immediate shipment to your location. These standard Stock Tote Bins are available with 1/4" or 1/2" F.E.M. Liners...either Zinc Plated or Unfinished.

NOTE: Special sizes and construction to fit your particular requirements are also available.

SPECIFICATIONS

MODEL NUMBER	DIMENSION A	DIMENSION B	DIMENSION C	DIMENSION D	DIMENSION E	DIMENSION F	F.E.M. SIZE	APPROX. WEIGHT
3043	17 5/16"	16"	1 3/4"	4"	4 1/2"	10"	1/2"	7 1/4 lbs.
